

Babra Koskei

Software Developer

An action-oriented software developer, able to create reusable UI components using React.js. She has incorporated this in her React project, a fitness app registration form that saves data and enables users to edit it before submitting. When she is not coding, she likes to blog about her perspective on life, with her most recent being her journey in the tech world.

TECHNICAL SKILLS

Knowledge in fundamental principles of design, which are key in the web design and development processes.

Able to write clean code by implementing Javascript ES6 features such as arrow functions and promises.

Able to work with third party API's and use their features, for quick deployment of the program.

Adept at using CSS3, HTML5, Bootstrap and media queries to create responsive websites.

Skilled in using React to create reusable UI components.

Knowledge in working with RESTful APIs.

PERSONAL PROJECTS

E-soko

- The idea of this project is to connect vegetable vendors to farmers and customers to ensure they get fresh fruits and vegetables delivered to them.
<https://github.com/Babrakoskei/e--commerce-website>

Breaking bad API

- A React-built website. It consumes a third-party API from Breaking Bad documentation(a popular series). Users can filter through characters of the show and get their information. It also incorporated css for great animations
<https://breaking-bad-api-reactapp.netlify.app>

Nike promo

- Used advanced CSS3 animations and javascript to bring a Nike sneaker advertisement UI to life
<https://nikepromo.netlify.app>

Cherish

- In the design phase of creating a mobile app that sells different products from cherry fruit.
<https://www.figma.com/file/DzdfxtxtmmnNz28PiW7Ly6/Cherish?node-id=0%3A1>

Flix n Chill

- A collaborative project, this is a website where users can watch Hollywood movie trailers. Incorporates CSS3 for amazing animation tricks and jQuery for functionality.
<https://flixnchill.netlify.app>

Data management tool

- In the research phase of an ongoing project, which aims to create a data management tool for community Health workers to ease their existing data collection methods.

EDUCATION

— codeHive Program

Diploma in Information Technology

02/2021 - Present

Nairobi, Kenya

Relevant Coursework

- **Front-end Web Development** - React Knowledge, HTML, CSS and Javascript.
- **Front-end Mobile Development** - Kotlin knowledge and building applications with Android studio
- **Backend Development** - Knowledge in python and building applications with Django framework.
- **UX/UI Design** - Creating designs using tools such as Adobe illustrator, XD and photoshop.
- **UX research** - Essential foundation for design strategy and use of design thinking.

— Anestar Victory High School

Kenya Certificate of Secondary Education

02/2016 - 12/2019

Nakuru, Kenya
